

Audit & Assurance Services

BKM Audit Services understands the importance of audits in these changing economic times. We aim to fully understand our client's business to ensure that we have the best opportunity to identify all risks that may affect our clients.

Our professionals provide a wide range of audit and assurance services with the intention of providing an objective and independent view that adds value to your business.

Our services

A wide range of services are offered by BKM Audit Services, these include:

- Statutory audits
- Due diligence reviews
- Internal control reviews
- Business and financial reviews
- Debtors and stock audits
- Audits of Self Managed Superannuation Funds (SMSF's)
- and other assurance services

Statutory audits

Based on our understanding of our client's environment we assess the risks of material misstatement while also investigating the chance of fraud. Our audit procedures are designed to comply with all audit regulatory requirements.

Due diligence reviews

Our extensive review procedures aim to ensure that the purchaser of a business is fully aware of all aspects prior to the purchase. This will help minimise the chance of any post-transaction issues they may cause grief to a new business owner.

Internal control reviews

The importance of having strong internal controls has increased with the global economic crisis. Our reviews aim at highlighting to management where weaknesses exist and measures to reduce the possibility of fraud occurring.

Self Managed Superannuation Funds (SMSF's)

We also have extensive knowledge in the area of Superannuation. We audit a number of SMSF's as required by law. This includes our in-house SMSF's and also audits from external accountants that outsource this work to us.
